SUMMARY

Aspiring IT professional with a passion for coding and creating user-friendly applications. Skilled in Python, HTML, CSS. Currently pursuing a BE in Information Technology, aiming to apply technical expertise and problem-solving skills in dynamic, innovative environments.

EDUCATION

Bachelor of Engineering in Information Technology   Nov, 2022 – May, 2026
A.C. Patil College of Engineering, Mumbai University, Kharghar

SKILLS

- **Programming Languages:** Python, HTML, CSS.
- **Relevant Courses:** Web Development Fundamentals, Artificial Intelligence, GenAI job Simulation,TCS iON Career Edge – Young Professional, Solution Architecture Job Simulation, What Is Generative AI?

PROJECTS

WordVoyage
Word Voyage is a feature-rich **dictionary application** that includes a **Word of the Day**, **Favorites Words**, **Search History**, **English to Marathi translations**, and **Word Suggestions**. Built with HTML, CSS , JAVASCRIPT, **Node.js**, **Express.js**, **MongoDB**, and **EJS**, it offers a user-friendly interface and secure **user authentication**. Check it out on GitHub.

Portfolio
A **modern**, **responsive** personal **portfolio website** showcasing **professional journey**, **technical skills**, **projects**, **certifications**, and **timeline**. Built with HTML, CSS, and JavaScript, it features a **clean UI**, **animated sections**, and interactive components like a **certificate modal viewer** and **contact form integration**. Key highlights include **section-wise navigation**, **animated background**, **scroll-based reveals**, and **mobile responsiveness** for seamless **user experience** across devices. Check it out on GitHub

Sarcasm Detection
A **sleek**, **responsive web application** that identifies **sarcasm** in user-entered sentences using a fine-tuned **NLP model** (e.g., **DistilBERT**). Built with **Flask**, HTML, CSS, and JavaScript, the app enhances accuracy through **contextual inputs** like the **situation** and the **conversation partner**. Key features include **sarcasm detection**, **context-aware analysis**, **feedback collection**, **prediction history**, and an animated **sidebar for navigation**. Check it out on GitHub.
